July 2010

To: My Colleagues in the Imaging Products Industry

As you know, the Int'l ITC has become a foundation for the growth of our industry. The Int'l ITC's inherent mission is to protect and grow companies of all sizes from the smallest remanufacturer to the largest supplies vendors.

With STMC, Int'l ITC offers the most basic tool of comparison for our industry. By utilizing STMC, customers can weed out the low quality suppliers. I believe that is the overriding goal of us all whether we are an OEM manufacturer or an aftermarket remanufacturer.

This does not come cheap. Over the last ten years we have supported the Int'l ITC through memberships, STMC fees, vendor contributions and bake sales. Our fearless leader, Tricia Judge has even contributed over \$13,000 of her own money to help fund the Int'l ITC. Frankly, that last part bothers me.

As the newly minted treasurer of the Int'l ITC executive committee, I think we all need to step up to fund an organization that exists entirely to support our businesses. With that in mind, I am launching a fund raiser to help the Int'l ITC continue to operate at the level our members expect. To do that, I need everyone's help.

Naturally, some can afford more, some less, some not at all. All contributions are critical. In order to make this easy to contribute, we will accept cash, credit cards, checks, payments over time, baseball cards or whatever.

I am including with this letter a contribution pledge form for your convenience. Depending on the level of contribution, Int'l ITC would like to offer our thanks in the form of undying gratitude and a choice of extremely useful materials for your business.

Thank you for your consideration!

Best Regards,

Bill Henry
Int'l ITC Treasurer

Int'l ITC – FOR THE FUTURE OF THE INDUSTRY
